## What We Do

### Individual Coaching

Insure that each member of your team utilizes his or her natural strengths. With a tool used by major organizations around the world including IBM Corporation, American Express, and Hershey Foods, Launch identifies each person's natural way of creating solutions and solving problems. The result is a more confident, productive, and satisfied individual.

### Team Synergy

Launch drives your team to ultimate synergy levels by scientifically coordinating each person's unique strengths. In understanding the natural talents of each team member, Launch identifies imbalanced or conflicting teams and provides solutions for restoring equilibrium. Ultimately, team members better understand their unique contribution and how to delegate responsibilities to others.

### Hiring Decisions

Finding the right person for a position is challenging. Incorporating the Launch Hiring Strategies in your selection process takes the guess work out of hiring and singles out the best candidate. With Launch, you discover a new evaluation dimension for job candidates and a concrete way of determining a person's fit. Whether hiring from outside of the organization or promoting from within, you confidently hire the right talent for the right position.
